WINDOWS

CUSTOM-MADE
TIMBER WINDOWS
FOR PERIOD, CONSERVATION
AND LISTED PROPERTIES

UNIQUE WINDOWS FOR UNIQUE BUILDINGS

Our bespoke timber windows are as original as the properties we create them for. As specialists in period, conservation and listed properties, no requirement is impossible. We can provide:

- Exact-match replacement and part replacement of sash windows and casement windows for architecturally sensitive properties
- Full range of specialist restoration and draught proofing services
- Understated solutions for modern security and performance needs, without compromising on the unique style and heritage of the property.

HERITAGE MEETS HIGH PERFORMANCE

From small one-off projects to large scale redevelopments, our handmade to measure heritage windows combine authentic, elegant design with the latest in modern performance, and can include:

- Exact-match section sizes, profiling and mouldings
- Specialist glazing options including acoustic glass, restoration glass, single glazing or TIMBALITE™ slimline double glazing units that look just like single glazing
- Exact-match slender, solid glazing bars
- Choice of the finest stable timbers, such as Accoya, which won't swell or warp
- Hand-puttied or timber beaded
- Hand-painted finish or full factory spray finish with high performance microporous paint

The first Grade II listed double-glazed building in Greenwich

SINGLE & DOUBLE GLAZING WITH A DIFFERENCE

We offer a range of specialist glazing options including acoustic glass for improved sound insulation, and restoration glass, to replicate crown glass, for the authentic heritage look.

Windows can be single glazed or double glazed with TIMBALITE™ slimline double glazed units, that look just like single glazing, but offer optimum thermal and acoustic performance.

Options include:

- Range of single glazing options including flat, restoration, laminate and acoustic
- Slimline double glazing units from as slim as 11mm
- Low E Softcoat 1.1 glass
- Slender solid glazing bars
- All options are externally glazed and can be timber beaded or hand-puttied

OUR CLIENTS

Whether it's small or large scale projects, we work with architects, contractors and homeowners across the South East and the Home Counties.

From small high-end refurbishment companies, through to large National main contractors, Timbawood is the ideal subcontract partner on all period, conservation and listed projects.

“At every opportunity, Timbawood are my first choice for refurbishing and installing sash windows, particularly on architecturally sensitive properties.”

Drew Muntz, Capital A

CASE STUDY: THE WHITE HOUSE

The White House is a historic Grade II listed building in West London overlooking the Thames at Isleworth, remodelled in 1832 for Sir William Cooper, Chaplain to George III.

Our client, a national developer, wanted to maintain the original architectural integrity of the property, while upgrading the acoustic performance of the windows being under Heathrow Airport's flight path.

The project required a complex range of our specialist services, including draught-proofing, part-replacement and full replacement of sash windows and bow-fronted french doors.

We needed a range of glazing types, exact-match components and careful restoration work on-site to meet the architectural and acoustic requirements.

The replacement windows featured exact-match mouldings, slender true glazing bars and slimline double glazing units with restoration laminated glass, all with a hand-puttied, hand painted finish.

CASE STUDY: GLOUCESTER CIRCUS

A Grade II listed building became the first double-glazed building in a conservation area in Greenwich after the owner contacted us to have the windows sensitively replaced.

We helped him put together a listed building application that included full detailed CAD designs, drawings and hand painted samples. The application included our plans to exact-match the original windows, with slimmer meeting rails, the distinct bicycle wheel design and delicate lambs tongue moulding, all handmade using traditional joinery techniques and with a hand painted finish.

Greenwich council voted unanimously in favour of the new windows, which included fitting our slimline double-glazing system Timbalite, that looks exactly like single glazing.

The complete Timbawood range includes:

HERITAGE RANGE

Bespoke timber windows and doors, ideal for listed buildings and conservation areas

CONSERVATION RANGE

Suitable for conservation areas and homes of distinction

PERIOD RANGE

Suitable for all period properties

TRADITIONAL RANGE

Suitable for all period and modern properties
